Profile of the Economy

[Source: Office of Macroeconomic Analysis]

Real gross domestic product (GDP)

In the first quarter of 2000, real GDP increased at a 5.4 percent annual rate. This was below the outsized 7.3 percent increase in the fourth quarter of 1999, but it exceeded the average quarterly gain of 4.4 percent during the last 4 years. The slowdown reflected deterioration in net exports as well as a fallback in inventory investment and in Federal spending. The latter two categories grew very rapidly in the fourth quarter of 1999 in anticipation of possible disruptions relating to the Year 2000 (Y2K) bug.

Although overall GDP growth slowed, domestic purchases other than in inventory investment were extraordinarily strong in the first quarter of 2000. Domestic final demand accelerated to an 8.0 percent annual rate from 5.9 percent in the fourth quarter of 1999. Personal consumption expenditures surged at an 8.3 percent pace, the fastest quarterly rate since early 1983. Growth in consumer spending picked up markedly in the last 3 years, fueled by rising income and by the wealth effects of stock market gains. Business fixed investment also strengthened in the first quarter of 2000. It rebounded at a 21.2 percent pace after growing just 2.9 percent in the fourth quarter of 1999. Deferred purchases of computer equipment until after the Y2K date change partly contributed to the investment swing.

The growing foreign trade deficit continued to drag on the economy in the first quarter of 2000, subtracting 1.3 percentage points from real growth. This was more than in recent quarters but less than the drag in the first quarter of 1999.

The national accounts measures of inflation accelerated in the first quarter of 2000, mainly reflecting higher energy prices. The GDP price index moved up at a 2.7 percent annual rate compared with 2.0 percent in the fourth quarter of 1999. However, after excluding food and energy, the core rate increased just 2.1 percent. This was less than the 2.2 percent rate in the previous quarter.

Growth of Real GDP

(Percent change, fourth quarter to fourth quarter)

Inflation

Inflation has picked up this year. Energy prices have increased sharply and are responsible for much of the acceleration. Core inflation, which excludes food and energy, still remains relatively moderate. Rising compensation costs are causing some concern, but continued productivity growth should help minimize the passthrough to prices.

Consumer prices increased at a 4.3 percent annual rate during the first 4 months of 2000. This was an acceleration of about 1-1/2 percentage points from 1999. Higher oil prices greatly contributed to the rise. Prices of petroleum-based energy products have risen at an annual rate of more than 50 percent after jumping by almost 30 percent in 1999. Core inflation accelerated to a 2.9 percent annual rate. That was up one percentage point from the 1.9-percent rise in 1999, the smallest yearly increase since 1965. Food prices rose at a modest 1.5 percent pace in 2000.

At the producer level, the pattern for finished goods prices generally mirrored developments at the consumer level. Finished goods prices rose at a 5.4 percent pace in the first 4

months of 2000, up from 2.9 percent in 1999. Core inflation remains moderate, increasing at a 1.2 percent annual rate. This follows a 0.9 percent rise in 1999. The increase in energy prices has accelerated from a little more than 18 percent in 1999 to just under 25 percent in 2000. Further back in the production chain, core prices for crude goods are rising at a slower rate than in 1999, but prices for core intermediate goods picked up.

Hourly compensation in the nonfarm business sector increased at a 4.2 percent annual rate in the first quarter, little different from the 4.3 percent rise recorded for all of 1999. Productivity growth slowed to a 2.4 percent annual rate during the first quarter of 2000 after a huge 6.9 percent jump in the fourth quarter of 1999. This boosted the increase last year to 3.7 percent. As a result, unit labor costs moved up at a 1.8 percent annual rate in the first quarter of 2000 after increasing by a slight 0.6 percent in 1999. The employment cost index for total compensation, a separate but closely watched compensation measure, jumped by 1.4 percent in the first quarter, an annual rate of 5.4 percent. Benefit costs rose sharply.

Consumer Prices

(Percent change from a year earlier)

Producer Prices - Finished Goods

(Percent change from a year earlier)

Employment and unemployment

Labor markets continue to grow at a brisk pace during the first 4 months of 2000. The unemployment rate fell below 4 percent for the first time in 30 years, but so far there is only modest evidence that wage pressure might be developing.

In recent months, the temporary hiring of employees to conduct the 2000 decennial census distorted the reported total nonfarm payroll employment growth. Excluding temporary census workers from the total nonfarm job increases of 458,000 in March and 340,000 in April would have trimmed the totals to 341,000 and 267,000, respectively. These are still

very strong results. So far in 2000, monthly job growth has averaged 243,000, after adjustment for census workers. This was slightly stronger than the 226,000 averaged during all of 1999. Job gains picked up in construction, which was helped by favorable weather early in 2000. Employment has been stable in manufacturing and increased in mining after declines for both in 1999. The large private service-producing sector had more temperate increases this year than last. Monthly gains averaged 185,000 during the first 4 months of 2000, down from 203,000 averaged during all of 1999. None the less, this still represents the largest source of job growth.

Unemployment Rate

(Percent)

Establishment Employment

(Average monthly change in thousands)

*Based on April data.

The economy continues to operate at a very high rate of labor utilization. Unemployment declined from 4.1 per cent of the labor force in February and March to 3.9 per cent in April. This was the lowest rate since the same reading in January 1970. The share of the working-age population employed reached a record-breaking 64.9 per cent in April.

Wage gains in nominal terms have remained surprisingly low. Over the past 12 months, average hourly earnings of production and other nonsupervisory workers advanced by only

3.8 per cent. This represents a slowing from a 12-month increase of 4.4 per cent 2 years ago, an unusual development in a period of tight labor markets. Growth during the first 4 months of 2000 picked up to a 4.5 per cent annual rate. This trend could be the first hint of acceleration, although developments over such a short period are seldom conclusive. In real terms, earnings rose by about 1/2 per cent during 1999, extending the prior 5 years' positive readings for the strongest performance since the early 1970s.

Real disposable personal income and consumer spending

Personal income rose at a 6.3 per cent annual rate in nominal terms in the first quarter of 2000. This extends the 6 per cent growth pace for the prior 4 years. Wages and salaries (the largest source of personal income) rose at a sharp 7.7 per cent annual rate in the first quarter, up from 6.5 per cent during all of 1999. Income from dividends and interest also strengthened somewhat relative to 1999. While nominal income growth remained reasonably stable, growth of real disposable (after-tax) personal income slowed in the first quarter to 3.2 per cent at an annual rate from 3.7 per cent in 1999. The slowdown reflected higher inflation in items purchased by consumers in the first quarter, mainly resulting from faster growth in oil prices.

Real consumer spending surged at an 8.3 per cent annual rate in the first quarter of 2000, the largest quarterly increase since 1983. The biggest gains continued to center in areas of discretionary spending, such as motor vehicles, furniture and appliances, recreational services, and clothing. Information on retail sales in April suggests that spending flattened out some early in the second quarter of 2000 after the outsized gain of the first quarter.

The greater increase in spending than in disposable income pulled the personal saving rate down further to only 0.7 per cent in the first quarter of 2000 from 1.8 per cent in the fourth quarter of 1999. The latest reading is the lowest since negative saving was recorded in 1933. The saving rate has declined steadily from a recent high of 8.7 per cent in 1992, primarily because of the growing "wealth effect" resulting from the stock market rise. Increases in asset values are not counted as income in the national income and product accounts, from which saving is calculated, but nonetheless contribute to the willingness of consumers to spend.

Industrial production and capacity utilization

Industrial production in manufacturing, mining and utilities continues to pick up in 2000. During the first 4 months of 2000, production rose at a strong 7.9 percent annual rate. This

represents a sharp improvement from 4.7 per cent over the 12 months of 1999 and only 2.5 per cent during 1998, when the effects of the Asian crisis curtailed activity.

Manufacturing production, which accounts for 88 per cent of total industrial output, has increased at an 8.3 per cent annual rate so far in 2000 compared to a gain of 5.2 per cent during all of 1999. The high-tech industries of computers, semiconductors and communications equipment continue to buoy growth, with an annual rate gain approaching 60 per cent this year. Excluding the high-tech category, factory output is advancing at only a 2.8 per cent rate so far during 2000, but that is still stronger than the 1.6 per cent rise during all of 1999. Production in the mining industry (5-1/2 per cent of industrial output) has risen at a 3.7 per cent pace in 2000, compared to 1.4 per cent in 1999. Output in mining had plunged by 7.0 percent during 1998, when falling oil prices resulted in sharply reduced activity in oil and gas extraction.

The combination of substantial production gains and slower capacity building resulted in a higher rate of industrial capacity utilization in 2000. In April, the utilization rate reached 82.1 per cent. This was slightly above the long-run average of 82.0 per cent and the highest level since May 1998. Despite a 1.7 percentage point advance over 1999, this rate still remains 2.3 percentage points below its expansion high of 84.4 percent reached in January 1995.

Nonfarm productivity and unit labor costs

There has been growing recognition that U.S. productivity growth has moved to a higher trend rate in recent years, the result of innovations and investment in information technology. Nonfarm business productivity (real output per hour worked) has risen at a 2.8 per cent annual rate since the end of 1995. That was double the rate averaged over the previous two decades. During 1999, nonfarm productivity grew by a particularly strong 3.6 per cent, including gains at nearly a 6.0 per cent pace during the final two quarters. In the first quarter of 2000, growth moderated to a still strong 2.4 per cent annual rate.

Hourly compensation costs in the nonfarm business sector rose at a 4.2 per cent annual rate in the first quarter of 2000, about the same as averaged in 1999. Unit labor costs, which reflect the interaction of compensation and productivity,

increased at a 1.8 per cent annual rate in the first quarter after rising by a narrow 0.6 per cent during all of 1999. Recent very low growth rates in unit labor costs have been important in helping to contain inflation and hold growth of prices of U.S. output to only 1.8 per cent over 1999.

Productivity in the manufacturing sector continues to register impressive gains. Factory output per hour soared at a 6.9 per cent annual rate in the first quarter of 2000. This matched the strong rate of increase during all of 1999. Hourly compensation costs in manufacturing rose at a 3.8 per cent pace in the first quarter. Because the increase in compensation was more than offset by rapid productivity growth, unit labor costs in manufacturing fell at a 2.9 per cent pace in the first quarter. The drop extended a 6-year declining trend, reducing factory unit labor costs by a total of 8.7 per cent.

Current account balance

The current account measures international trade in goods and services as well as the net flow of investment income and net unilateral transfers. The current account has been in deficit almost continuously since the early 1980s. In 1999, the current account deficit reached a record \$338.9 billion, representing an all-time high 3.7 percent share of nominal GDP.

The deficit widened substantially during the 1990s primarily because of deterioration in the merchandise trade balance. U.S. economic growth outpaced that of its major trading partners, causing imports to grow much more rapidly than exports. Sharp dollar appreciation from 1995 to 1998 and higher prices for imported oil since 1999 contributed to the widening trade gap. The merchandise trade deficit doubled in the last 5 years to \$347.1 billion in 1999, a record high. It continued to increase in the first quarter of 2000.

Other major components of the current account contributed to the growing deficit. The surplus on trade in services narrowed in the last 2 years. In addition, what had been a positive

balance on investment income shifted to a negative in 1998 and 1999. Large inflows of capital into the United States boosted payments of earnings and interest to foreigners.

The current account deficit is matched by offsetting transactions in the financial and capital accounts, plus a statistical discrepancy. The financial account recorded a net inflow of \$378.2 billion in 1999 as inflows for foreign-owned assets in the United States far exceeded outflows for U.S.-owned assets abroad. Net inflows of foreign direct investment and of private securities, including equities, jumped sharply.

Exchange rate of the dollar

Since 1995, the exchange rate of the dollar against a broad index of important U.S. trading partners' currencies increased markedly as economic growth in this country outpaced that of most of the U.S.'s trading partners. After some volatility in 1998, the exchange rate leveled out in 1999 before rising again since October. The dollar appreciated by 1.9 percent from October through April against the broad index of currencies.

All of the appreciation was against the major currencies of the most important U.S. trading partners. These currencies consist of the euro plus those of other major partners such as Canada, Japan and the United Kingdom. Since October 1999, the dollar has increased by 4.8 percent against that narrow range of major currencies. In contrast, the dollar remains relatively steady against the currencies of other important U.S. trading partners.

The performance of the dollar against the aggregate index of major currencies masks divergent patterns among individual currencies. The dollar appreciated steadily by more than 13 percent from October through April against the euro. The exchange rate against the yen was more volatile. Since its most recent peak in August 1998, the exchange rate of the dollar against the yen fell by almost 30 percent through December 1999, then improved by 3 percent from December through April. The yen strengthened in 1999 amid expectations that a recovery in the Japanese economy was imminent. In addition, strong foreign interest in Japanese equities helped augment the yen's rise.

Interest rates

The Federal Reserve tightened monetary policy because of concern that the faster growth in demand than in potential supply could result in inflation. In 1999, the Federal Reserve raised short-term interest rates three times by a total of 75 basis points. This reversed the easing moves made in 1998 during the period of global financial turmoil. So far in 2000, the Federal Reserve increased rates three more times by a total of 100 basis points (1 percentage point). The six increases raised the key Federal funds target rate (the rate that banks charge each other for overnight loans) from 4.75 percent to 6.50 percent.

The discount rate (the rate the Federal Reserve charges banks for short-term funds) was raised from 4.50 percent to 6.0 percent. The market interest rate for the 3-month Treasury bill, which usually centers on the level of the discount rate, was about 6.2 percent in mid-May.

Rates on long-term Treasury securities increased through 1999 and in early 2000 as economic growth continued to expand at a rapid pace. The interest rate on the 10-year Treasury note rose from about 4.7 percent at the end of 1998 to over 6.6 percent in early 2000. The rate on the 30-year Treasury bond rose from 5.1 percent to 6.6 percent over that period. In 2000,

long-term yields eased as the price of securities rose. The higher prices largely reflected concern that buybacks and reduced new long-term debt issuance by the Treasury because of growing budget surpluses would shrink the Treasury securities supply. In May, yields moved up again.

Mortgage interest rates, which follow the pattern of the interest rate on the 10-year Treasury note, also have increased since 1998. The interest rate on a conventional 30-year fixed rate loan rose from a 30-year low of 6.7 per cent in October 1998 to 8.2 per cent in April 2000. Rising mortgage interest rates have dampened housing activity.

Short-term Interest Rates

(Percent)

Long-term Interest Rates

(Percent)

Housing

Activity in the housing market has slowed a bit because of rising mortgage interest rates, but it remains at a fairly high level. Rapid gains in employment and income and the wealth effects of rising stock prices have continued to support strong demand for housing despite the increase in mortgage costs.

Sales of new single-family homes posted a new record of 904,000 in 1999. This was only about 2 per cent higher than in 1998 when new home sales rose by almost 10 per cent. Resales of existing homes also reached a new record in 1999, climbing 4.5 percent above the 1998 total to 5.2 million. New home sales accelerated in the first quarter of 2000, partly due to unusually mild weather.

Growth in sales of both new and existing homes over the past several years has led to a dramatic increase in homeownership. Since the beginning of 1993, the number of new home owners has grown by almost 9 million. The homeownership rate rose to 67.1 per cent in the first quarter of 2000, an all-time record.

Construction of new housing units moved up to 1.67 million in 1999. This was the highest annual total since 1986. Starts of single-family homes rose by 5 per cent to a 21-year peak, while starts of multi-family units declined slightly. Total housing starts rose further in the first quarter of 2000 to an annual rate

of 1.73 million. All of that increase was for multi-family construction. Starts of new single-family homes eased slightly after a large jump in the fourth quarter of 1999. Strength in total housing starts in 1999 and 2000 translated into large increases in real residential investment.

Federal budget

The Federal budget is expected to show a much larger surplus in fiscal 2000 than the \$167 billion projected in the Administration's "Fiscal Year 2001 Budget" (released in February). Fiscal 2000 will mark the third consecutive year of Federal budget surplus after 28 years of deficits. The surplus grew to \$124 billion in fiscal 1999 from \$69 billion in fiscal 1998. Strong economic growth and passage of deficit reduction programs placed the deficit on a downward course after it reached an all-time high of \$290 billion in fiscal 1992. The surpluses are estimated to reduce the amount of Federal debt held by the public by a total of \$355 billion by the end of fiscal 2000.

Since 1992, growth in Federal outlays has remained restrained while strong growth in jobs, income and capital gains has boosted receipts. Outlays increased just 3.0 per cent in fiscal 1999 and dipped to 18.7 per cent in relation to GDP, the

lowest rate in 25 years. Outlays are expected to grow somewhat faster in fiscal 2000 than last year but by much less than receipts. Receipts were projected to rise by about 7.0 per cent this year compared with 6.1 per cent in fiscal 1999, but so far the pace has risen even higher. Improvement in corporate profits and strong increases in individual income and capital gains have driven the acceleration in tax receipts this fiscal year.

The "Fiscal Year 2001 Budget" forecasted that surpluses will continue. By directing the surpluses toward continued debt reduction, firming the long-run solvency of Social Security and Medicare, and making investments to enhance the economic expansion, the \$3.6 trillion debt held by the public at the end of fiscal 1999 could be completely paid off by 2013.

Net national saving and investment

Net national saving averaged 7.3 percent of net national product (NNP) in 1999, slightly below the 7.6 per cent for all of 1998. (Net saving and NNP exclude depreciation to replace wornout or obsolete equipment, software and structures used in production.) The saving rate for 1999 is still nearly double the 3.9 percent reached in 1993, the lowest rate for any year since the 1930s.

The swing in the Federal budget from large deficits into surplus has more than accounted for the improvement. As a result, the public sector moved from dissaving equivalent to 4.7 percent of NNP in 1993 (and an even larger 5.4 per cent in 1992) to saving of 2.1 per cent in 1999. Despite the progress, net saving still remains well below the 11.6 per cent of NNP averaged in the 1950s and 1960s.

Net National Saving
(Saving as a percent of NNP)

Private saving declined from a recent high of 9.4 per cent of NNP in 1992 to 5.2 per cent in 1999. A sharp fall in saving by households has more than offset a gain in corporate saving. Increased wealth generated by a surging stock market is an important factor in the reduced desire of households to save out of current income. In 1999, personal saving was equivalent to only 1.9 per cent of NNP, down from 7.4 percent in 1992. Growth of corporate profits, on the other hand, lifted net corporate saving from 2.2 per cent of NNP in 1992 to 3.3 per cent in 1999.

Net domestic investment (by government and private industry in structures, equipment, software and inventory) increased from a very low 5.2 per cent of NNP in 1991 to 9.7 per cent in 1999. A large portion of this investment was financed from abroad, as U.S. net foreign investment swung from 0.3 per cent of NNP in 1991 to -3.9 per cent in 1999.

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which thereappropriaion act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by issuance of checks or the disbursement of cash—*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of liability ties are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called government receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain liens, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts.

They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts which include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the “Report of the President’s Commission on Budget Concepts” as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government’s fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity’s receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1**, **FFO-2** and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing offices, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effects on assets and liabilities of the Government. Data are derived from the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surpluses or deficit, as well as transactions in Federal securities, monetary assets and balances in Treasury operating cash.
 - Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties and net miscellaneous receipts.
 - Table **FFO-3** details on- and off-budget outlays by agency.
 - Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.
 - Table **FFO-5** summarizes internal revenue receipts by regions and districts and by type of tax. Amounts reported are collections made in a fiscal year. They span several taxable years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).
- Amounts are reported based on the primary filing address provided by each tax payer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In

Budget Results and Financing of the U.S. Government and Second-Quarter Receipts by Source

Second-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the second quarter of fiscal 2000 supplements fiscal data reported in the March issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts, net of refunds, were \$201.8 billion for the second quarter of fiscal 2000. This is an increase of \$8.7 billion over the comparable prior year quarter. Withheld receipts increased by \$19.8 billion and non-withheld receipts increased by \$5.6 billion during this period. Refunds increased by \$16.7 billion over the comparable fiscal 1999 quarter. There was an increase of \$0.5 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal 1999.

Corporation income taxes—Net corporate income tax receipts were \$31.4 billion for the second quarter of fiscal 2000. This is an increase of \$6.5 billion compared to the prior year second quarter. The \$6.5 billion change is comprised of an increase of \$5.6 billion in estimated and final payments, and a decrease of \$0.9 billion in corporate refunds.

Employment taxes and contributions—Employment taxes and contributions receipts for the second quarter of fiscal 2000 were \$159.2 billion, an increase of \$13.2 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by \$7.9 billion, \$2.3 billion, and \$3.0 billion respectively. There was a -\$0.2 billion adjustment for prior years employment tax liabilities made in the second quarter of fiscal 2000, while there was a \$0.3 billion adjustment in the second quarter of fiscal 1999.

Unemployment insurance—Unemployment insurance receipts, net of refunds, for the second quarter of fiscal 2000 were \$3.9 billion, an increase of \$0.2 billion over the comparable quarter of fiscal 1999. Net State taxes deposited in the U.S. Treasury increased by \$0.2 billion to \$2.8 billion. Net Federal Unemployment Tax Act (FUTA) taxes did not change significantly from \$1.1 billion.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.2 billion for the second quarter of fiscal 2000, an increase of \$0.1 billion over receipts from the comparable quarter of fiscal 1999. The growth in contributions will remain relatively flat over the next few years as the number of employees covered by the Federal Employees' Retirement System (FERS) grows slowly relative to those covered under the Civil Service Retirement System (CSRS).

Excise taxes—Net excise tax receipts for the second quarter of fiscal 2000 were \$16.1 billion, an increase of \$1.5 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$0.5 billion, not significant change over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$6.3 billion for the second quarter of fiscal 2000. These receipts represent an increase of \$0.3 billion over the same quarter in fiscal 1999.

Customs duties—Customs duties net of refunds were \$4.3 billion for the second quarter of fiscal 2000. This is an increase of \$0.1 billion over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the second quarter of fiscal 2000 were \$9.5 billion, an increase of \$1.6 billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve Banks increasing by \$0.6 billion.

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of Treasury's (Treasury) operating cash is maintained in accounts with the Federal Reserve Banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include the Daily Balance Wire received from the FRBs and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment and Fedwire Deposit Systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147, Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depository financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax and loan accounts in ter-

est-bearing obligations participate under the Note Option. The program permits Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so under the Remittance Option.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments, which the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series and taxes.

² Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

³ Taxes eligible for credit consist of those deposited by tax payers in the tax and loan depositories as follows: With held in come taxes beginning March 1948; taxes on employees

and employers under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Employment Tax Act taxes beginning April 1970 and individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the "Treasury Bulletin" reflect the total. Further detailed information is published in the "Monthly Statement of the Public Debt of the United States." Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities—that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.

- Table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the "Monthly Treasury Statement of Receipts and Outlays of the United States Government.")

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

The average length hit a low of 2 years, 5 months in December 1975. The length then gradually increased until it reached a high of 6 years, 4 months in May 1991. Since then, the average length has decreased. For example, during most of 1996 the average length was at 5 years, 3 months.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 per cent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

¹ Beginning September 1976, the maturity distribution and average length were calculated on the interest-bearing marketable debt privately held. Inflation-indexed notes (first offered in 1997) are excluded from the average length calculation. Published data were changed for the

end of the fiscal years back through 1967.

² Consists of guaranteed debt issued by the Federal Housing Administration.

CHARTS FD-A.—Average Length of Privately Held Marketable Debt

(Charts are plotted from figures provided by the Office of Market Finance. See Table FD-5.)

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities, current bills, notes and bonds.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable public debt securities other than regular weekly and 52-week bills. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate break out is provided for the combined holdings of the Government accounts and Federal Reserve Banks (FRBs), so that the "all other investors" category includes all private holdings.
- Table **PDO-2** presents the results of weekly auctions of 13- and 26-week bills, as well as auctions of 52-week bills.

Treasury bills mature each Thursday. New issues of 13-week bills are *reopening* of 26-week bills. New issues of *cash management bills* also are presented. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made both on a competitive and non-competitive basis.

Treasury accepts noncompetitive tenders of up to \$1 million for bills and \$5 million for notes and bonds in each auction of securities to encourage participation of individuals and smaller institutions.

- Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Included are: notes and bonds from table PDO-1, 52-week bills from table PDO-2, and data for cash management bills.

- Table **PDO-4** indicates the total amount of marketable securities allotted to each class of investor. The FRBs tally into investor classes the tenders in each auction of marketable securities other than weekly auctions of 13- and 26-week bills.

TREASURY FINANCING: JANUARY-MARCH

[Source: Bureau of the Public Debt, Office of Financing]

On February 2, 2000, Treasury announced it will issue 52-week bills only four times each year (effective after the bill issued on March 2, 2000) and only one 30-year inflation-indexed bond each year (in October).

JANUARY

Auction of 10-Year Inflation-Indexed Notes

On January 5, 2000, Treasury announced it would auction \$6,000 million of 10-year inflation-indexed notes to raise cash. The notes of Series A-2010 were dated January 15, 2000, and issued January 18, 2000. They are due January 15, 2010, with interest payable on July 15 and January 15 until maturity.

Treasury received tenders for the notes before 12 noon eastern standard time (e.s.t.) for noncompetitive tenders and before 1 p.m. e.s.t. for competitive tenders on January 12. Tenders totaled \$18,425 million; Treasury accepted \$6,001 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.333 percent with an equivalent adjusted price of 99.298. Tenders at the high yield were allotted 30 percent. Treasury accepted in full all competitive tenders at yields lower than 4.333 percent. The median yield was 4.300 percent, and the low yield was 4.200

percent. Noncompetitive tenders totaled \$82 million. Competitive tenders accepted from private investors totaled \$5,919 million.

In addition to the \$6,001 million of tenders accepted in the auction process, Treasury accepted \$316 million from Federal Reserve Banks (FRBs) for their own accounts. The minimum par amount required for STRIPS of inflation-indexed notes is \$1,000.

Treasury Calls 8-1/4 Per cent Bonds of 2000-05

On January 14, 2000, Treasury announced the call for redemption at par on May 15, 2000, of the 8-1/4 per cent Treasury bonds of 2000-05, dated May 15, 1975. They are due May 15, 2005. There were \$4,224 million of these bonds outstanding, of which \$2,047 million were held by private investors.

Auction of 2-Year Note

On January 19, Treasury announced it would auction \$14,000 million of 2-year notes. The issue was to refund \$25,686 million of securities maturing January 31 and to pay down about \$11,686 million.

The notes of Series R-2002 were dated January 31, 2000. They are due January 31, 2002, with interest payable on July 31 and January 31 until maturity. Treasury set an interest rate of 6-3/8 percent after determining which tenders were accepted on a yield auction basis.

TREASURY FINANCING: JANUARY-MARCH, con.

Treasury received tenders for the notes before 12 noon e.s.t. for non competitive tenders and before 1 p.m. e.s.t. for competitive tenders on January 26. Tenders totaled \$28,386 million; Treasury accepted \$14,002 million. All non competitive and successful competitive bidders were allotted securities at the high yield of 6.434 percent with an equivalent price of 99.891. Tenders at the high yield were allotted 28 percent. Treasury accepted in full all competitive tenders at yields lower than 6.434 percent. The median yield was 6.417 percent, and the low yield was 6.350 percent. Noncompetitive tenders totaled \$1,600 million. Competitive tenders accepted from private investors totaled \$12,403 million.

In addition to the \$14,002 million of tenders accepted in the auction process, Treasury accepted \$1,300 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$4,045 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series R-2002 is \$1,600,000.

52-Week Bills

On December 30, 1999, Treasury invited tenders for approximately \$10,000 million of 364-day Treasury bills. The bills were dated January 6, 2000, and will mature January 4, 2001. The issue was to refund \$27,545 million of all maturing bills and to pay down about \$2,545 million. Treasury auctioned the bills on January 4. Tenders totaled \$25,566 million; Treasury accepted \$10,016 million. That included \$918 million of noncompetitive tenders from the public and \$1,390 million of the bills issued to FRBs as agents for foreign and international monetary authorities. In addition, Treasury issued \$4,925 million of the bills to FRBs for their own accounts. The high bank discount rate was 5.645 percent.

FEBRUARY

February Quarterly Financing

On February 2, Treasury announced it would auction: \$12,000 million of 4-3/4-year 5-7/8 percent notes; \$10,000 million of 10-year notes; and \$10,000 million of 30-1/4-year bonds to refund \$27,624 million of Treasury securities maturing February 15 and to raise about \$4,376 million of new cash.

The 4-3/4-year 5-7/8 percent notes of Series H-2004 were dated November 15, 1999, and issued February 15, 2000. They are due November 15, 2004, with interest payable on May 15 and November 15 until maturity. Accrued interest of \$14.84890 per \$1,000, covering the period from November 15, 1999, to February 15, 2000, was payable with each accepted tender.

Treasury received tenders for the notes before 12 noon e.s.t. for non competitive tenders and before 1 p.m. e.s.t. for competitive tenders on February 8. Tenders totaled \$22,822 million; Treasury accepted \$12,000 million. All non competitive and successful competitive bidders were allotted securities at the high yield of 6.741 percent with an equivalent price of 96.505. Tenders at the high yield were allotted 98 percent. Treasury accepted in full all competitive tenders at yields lower than 6.741. The median yield was 6.710 percent, and the low yield

was 6.650 percent. Noncompetitive tenders totaled \$608 million. Competitive tenders accepted from private investors totaled \$11,392 million.

In addition to the \$12,000 million of tenders accepted in the auction process, Treasury accepted \$1,100 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$1,130 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series H-2004 is \$1,600,000.

The notes of Series B-2010 were dated February 15, 2000. They are due February 15, 2010, with interest payable on August 15 and February 15 until maturity. Treasury set an interest rate of 6-1/2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12 noon e.s.t. for non competitive tenders and before 1 p.m. e.s.t. for competitive tenders on February 9. Tenders totaled \$14,512 million; Treasury accepted \$10,000 million. All non competitive and successful competitive bidders were allotted securities at the high yield of 6.540 percent with an equivalent price of 99.710. Tenders at the high yield were allotted 49 percent. Treasury accepted in full all competitive tenders at yields lower than 6.540 percent. The median yield was 6.465 percent, and the low yield was 6.390 percent. Noncompetitive tenders totaled \$177 million. Competitive tenders accepted from private investors totaled \$9,823 million.

In addition to the \$10,000 million of tenders accepted in the auction process, Treasury accepted \$1,100 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$1,170 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series B-2010 is \$400,000.

The bonds of May 2030 were dated November 15, 1999, and issued February 15, 2000. They are due May 15, 2030, with interest payable on May 15 and November 15 until maturity. Treasury set an interest rate of 6-1/4 percent after determining which tenders were accepted on a yield auction basis. Accrued interest of \$15.79670 per \$1,000, covering the period from November 15, 1999, to February 15, 2000, was payable with each accepted tender.

Treasury received tenders for the bonds before 12 noon e.s.t. for non competitive tenders and before 1 p.m. e.s.t. for competitive tenders on February 10. Tenders totaled \$13,257 million; Treasury accepted \$10,001 million. All non competitive and successful competitive bidders were allotted securities at the high yield of 6.340 percent with an equivalent price of 98.771. Tenders at the high yield were allotted 51 percent. Treasury accepted in full all competitive tenders at yields lower than 6.340 percent. The median yield was 6.207 percent, and the low yield was 6.100 percent. Noncompetitive tenders totaled \$34 million. Competitive tenders accepted from private investors totaled \$9,968 million.

In addition to the \$10,001 million of tenders accepted in the auction process, Treasury accepted \$100 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$1,170 million from FRBs for their own accounts.

TREASURY FINANCING: JANUARY-MARCH, con.

counts. The minimum par amount required for STRIPS of bonds of May 2030 is \$32,000.

Auction of 2-Year Notes

On February 16, Treasury announced it would auction \$12,000 million of 2-year notes. This issue was to refund \$27,053 million of securities maturing February 29 and to pay down about \$15,053 million.

The notes of Series S-2002 were dated February 29, 2000. They are due February 28, 2002, with interest payable on August 31 and February 28 until maturity. Treasury set an interest rate of 6-1/2 percent after determining which tenders were accepted on a yield basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1 p.m. e.s.t. for competitive tenders on February 23. Tenders totaled \$31,974 million; Treasury accepted \$12,009 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.590 percent with an equivalent price of 99.834. Tenders at the high yield were allotted 18 percent. Treasury accepted in full all competitive tenders at yields lower than 6.590 percent. The median yield was 6.570 percent, and the low yield was 6.520 percent. Noncompetitive tenders totaled \$1,509 million. Competitive tenders accepted from private investors totaled \$10,500 million.

In addition to the \$12,009 million of tenders accepted in the auction process, Treasury accepted \$1,300 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$3,219 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series S-2002 is \$400,000 million.

52-Week Bills

On January 27, Treasury invited tenders for approximately \$10,000 million of 364-day Treasury bills. The bills were dated February 3, 2000, and will mature February 1, 2001. The issue was to refund \$28,483 million of all maturing bills and to pay down about \$4,483 million. Treasury auctioned the bills on February 1. Tenders totaled \$23,844 million; Treasury accepted \$10,000 million. That included \$1,087 million of non-competitive tenders from the public and \$1,483 million is sued to FRBs as agents for foreign and international monetary authorities. Treasury is sued an additional \$804 million to FRBs as agents for foreign and international monetary authorities for new cash. In addition, Treasury is sued \$5,420 million to FRBs for their own accounts. The high bank discount rate was 5.905 percent.

Cash Management Bills

On February 15, Treasury invited tenders for approximately \$30,000 million of 69-day bills. The bills were sued February 18, 2000, representing an additional amount of bills dated April 29, 1999, maturing April 27, 2000. The issue was to raise new cash. Tenders were opened on February 17. They totaled

\$56,198 million; Treasury accepted \$30,006 million. The high bank discount rate was 5.70 percent.

M A R C H

Auction of 2-Year Notes

On March 22, Treasury announced it would auction \$12,000 million of 2-year notes. The issue was to refund \$26,879 million of securities maturing March 31 and to pay down about \$14,879 million.

The notes of Series T-2002 were dated March 31, 2000. They are due March 31, 2002, with interest payable on September 30 and March 31 until maturity. Treasury set an interest rate of 6-1/2 percent after determining which tenders were accepted on a yield basis.

Treasury received tenders for the notes before 12 noon e.s.t. for noncompetitive tenders and before 1 p.m. e.s.t. for competitive tenders on March 29. Tenders totaled \$30,835 million; Treasury accepted \$12,005 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.580 percent with an equivalent price of 99.852. Tenders at the high yield were allotted 33 percent. Treasury accepted in full all competitive tenders at yields lower than 6.580 percent. The median yield was 6.550 percent, and the low yield was 6.480 percent. Noncompetitive tenders totaled \$1,917 million. Competitive tenders accepted from private investors totaled \$10,088 million.

In addition to the \$12,005 million of tenders accepted in the auction process, Treasury accepted \$1,700 million from FRBs as agents for foreign and international monetary authorities. It also accepted \$3,515 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series T-2002 is \$400,000.

52-Week Bills

On February 24, Treasury invited tenders for approximately \$10,000 million of 364-day Treasury bills. The bills were dated March 2, 2000, and will mature March 1, 2001. The issue was to refund \$27,298 million of all maturing bills and to pay down about \$298 million. Treasury auctioned the bills on February 29. Tenders totaled \$24,200 million; Treasury accepted \$10,015 million. That included \$1,083 million of non-competitive tenders from the public and \$1,612 million is sued to FRBs as agents for foreign and international monetary authorities. Treasury is sued an additional \$792 million to FRBs as agents for foreign and international monetary authorities for new cash. In addition, Treasury is sued \$4,805 million to FRBs for their own accounts. The high bank discount rate was 5.840 percent.

Cash Management Bills

On February 29, Treasury invited tenders for approximately \$25,000 million of 13-day bills. The bills were sued March 3, 2000, representing an additional amount of bills dated September 16, 1999. They matured March 16, 2000. The issue was to raise new cash. Tenders were opened on March 2. They totaled \$73,094 million; Treasury accepted \$25,014 million. The high bank discount rate was 5.67 percent.

TREASURY FINANCING: JANUARY-MARCH, con.

On March 23, Treasury invited tenders for approximately \$35,000 million of 21-day bills. The bills were issued March 30, 2000, representing an additional amount of bills dated October 21, 1999, maturing April 20, 2000. This issue was to raise new cash. Tenders were opened on March 28. They totaled \$54,001 million; Treasury accepted \$35,003 million. The high bank discount rate was 5.99 percent.

In the same announcement on March 23, Treasury invited tenders for approximately \$30,000 million of 19-day bills. They were dated March 30, 2000, and matured April 18, 2000. This issue was to raise new cash. Tenders were opened on March 29. They totaled \$57,225 million; Treasury accepted \$30,071 million. The high bank discount rate was 6.00 percent.

¹ All 13-week bills represent additional issues of bills with an original maturity of 26 weeks or 52 weeks. Certain 26-week bills represent additional issues of bills with an original maturity of 52 weeks.³Tenders for \$1 million or less from any one bidder are accepted in full at the high price of accepted competitive bids. All Treasury marketable auctions are conducted in a single-price format as of November 2, 1998.² Includes amounts exchanged on non competitive basis by Government accounts and Federal Reserve Banks.⁴ Equivalent coupon-issue yield.

See footnotes at end of table.

**TABLE PDO-3.—Public Offerings of Marketable Securities
Other than Regular Weekly Treasury Bills, con.**

¹ Currently, all issues are sold at auction. For bills, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.

² From date of additional issue in case of a re-opening.

³ In reopenings, the amount accepted is in addition to the amount of original offerings.

⁴ Includes securities issued to U.S. Government accounts and Federal Reserve Banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

⁵ Interest began to accrue before the issue date (settlement date) of this loan.

⁶ Accepted yields ranged up to 3.899% (adjusted price 99.578) in this single-price auction of an inflation-indexed bond.

⁷ Accepted yields ranged up to 5.017% (price 99.968) in this single-price auction.

⁸ Accepted yields ranged up to 5.367% (price 99.493) in this single-price auction.

⁹ Accepted yields ranged up to 5.510% (price 99.923) in this single-price auction.

¹⁰ Accepted yields ranged up to 5.315% (price 99.878) in this single-price auction.

¹¹ Accepted yields ranged up to 5.754% (price 99.993) in this single-price auction.

¹² Accepted yields ranged up to 4.040% (adjusted price 100.033) in this single-price auction of an inflation-indexed note.

¹³ Accepted yields ranged up to 5.544% (price 99.917) in this single-price auction.

¹⁴ Accepted yields ranged up to 6.014% (price 99.940) in this single-price auction.

¹⁵ Accepted yields ranged up to 6.085% (price 99.370) in this single-price auction.

¹⁶ Accepted yields ranged up to 6.144% (price 99.741) in this single-price auction.

¹⁷ Accepted yields ranged up to 5.557% (price 99.893) in this single-price auction.

¹⁸ Accepted yields ranged up to 5.665% (price 99.925) in this single-price auction.

Note.—Starting with the January 5, 1999, auction, amounts listed as tendered and accepted are amounts tendered and awarded on auction day. Before the January 5, 1999, auction, amounts listed as tendered and accepted are amounts tendered and awarded on issue day.

¹ Exclusive of banks and insurance companies.

² Included with "All other" investors are certain Government deposit accounts and Government-sponsored agencies, formerly included with Government accounts.

Note.—For detail of offerings, see table PDO-3.

** Beginning July 1999, different procedures and categories are used to classify the bids by type of investor.

INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since January 1, 1998, and series I bonds, on sale since September 1, 1998, are the savings bonds currently being sold. Series HH bonds are issued in exchange for Series E and EE savings bonds and savings notes. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to pay roll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980,

through October 31, 1982. Series J and K were sold from May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and in the Annual Report of the Secretary of the Treasury for fiscal 1974.

TABLE SBN-1.—Sales and Redemptions by Series, Cumulative through Mar. 31, 2000

[In millions of dollars. Source: "Monthly Statement of the Public Debt of the United States," Bureau of the Public Debt, Office of Public Debt Accounting]

Series	Sales ¹ (1)	Accrued discount (2)	Sales plus accrued discount (3)	Redemptions ¹ (4)	Amount outstanding	
					Interest- bearing debt (5)	Matured non- interest-bearing debt (6)
Savings bonds:						
Series A-D ²	3,949	1,054	5,003	5,002	-	1

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

- Table **OFS-1** presents Treasury marketable and non-marketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated amount of public debt securities held by private investors. Information is obtained from sources such as the Federal financial institution regulatory agencies. State, local and foreign holdings include special issues of non-marketable securities to municipalities and foreign official counts. They also include municipal, foreign official and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

TABLE OFS-1.—Distribution of Federal Securities by Class of Investors and Type of Issues

Excludes Treasury securities held under repurchase agreements in custody accounts at the Federal Reserve Bank of New York. Estimates reflect the 1984 benchmark to December 1989, the 1989 benchmark to December 1994 and the 1994 benchmark to December 2000.⁹ Includes individuals, government-sponsored enterprises, brokers and dealers, pension trusts and estates, corporate and non-corporate businesses, and other investors.

Note.—Ownership data were revised (in June 1999) back to March 1989 in order to update ownership categories and to incorporate greater reliance on Flow of Funds data of the Federal

INTRODUCTION: Market Yields

The tables and charts in this section present yields on Treasury marketable securities, and compare long-term yields on Treasury securities with yields on long-term corporate and municipal securities.

- Table **MY-1** lists Treasury market bid yields at constant maturities for bills, notes and bonds. The Treasury yield curve in the accompanying chart is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. on the last business day of the calendar quarter.

The Treasury uses quotations obtained by the FRB of New York to derive the yield curve, based on semiannual interest payments and read at constant maturity points to develop a consistent data series. Yields on Treasury bills are coupon equivalent yields of bank *discount rates* at which Treasury bills trade in the market. The Board of Governors of

the Federal Reserve System publishes the Treasury constant maturity data series in its weekly H.15 press release.

- Table **MY-2** shows average yields of long-term Treasury, corporate and municipal bonds. The long-term Treasury average yield is the 30-year constant maturity yield. The corporate bond average yield is developed by Treasury by calculating reoffering yields on new long-term securities maturing in at least 20 years and rated Aa by Moody's Investors Service. The municipal bond average yield prior to 1991 was compiled by Treasury. Beginning with January 1991, the average yield is the "Municipal Bond Yield Average," published by Moody's Investors Service for 20-year reoffering yields on selected Aa-rated general obligations. See the footnotes for further explanation.

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury excludes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, various U.S. Mint offices, the Federal Reserve Banks and the Federal Reserve Board.

¹ Issued on or after July 1, 1929.² Excludes coins sold to collectors at premium prices.³ Includes \$481,781,898 in standard silver dollars.⁴ Represents value of certain partial denominations not presented for redemption.⁵ Based on Bureau of the Census estimates of population.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserves as assets, liabilities to *foreigners* and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table IFS-1 shows reserves as assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund*

(IMF), holdings of convertible foreign currencies and reserve position in the IMF.

- Table IFS-2 contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

- Table IFS-3 shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to Title 31 United States Code 5117 (b) it sues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

⁶ Includes an SDR \$361 million loan to the IMF under the General Arrangements to Borrow in July 1998, and an SDR \$619 million loan to the IMF under the New Arrangements to Borrow in December 1998.

¹ Includes Bank for International Settlements.² Derived by applying reported transactions to benchmark data.³ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1988, 20-year maturity issue and beginning March 1990, 30-year maturity issue; Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to Table IFS-3.⁴ Includes debt securities of U.S. Government corporations, federally sponsored agencies and private corporations.⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank and the Asian Development Bank.

Note.—Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

¹ Beginning April 1993, includes current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issued to the government of Argentina. Face value of the issue is \$6,685 million.

² Includes the current value of the following zero-coupon Treasury bond issued to the government of Mexico: Beginning March 1988, 20-year maturity is due with remaining face value of \$1,508 million that was retired in full in April 1997; and beginning March 1990, 30-year maturity

is due with remaining face value of \$18,112 million.

³ Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issued to the Republic of Venezuela. Remaining face value of issue is \$2,721 million.

INTRODUCTION: Capital Movements

Treasury collects information about the transference of financial assets and other portfolio capital movements between the United States and foreigners and has since 1935. Commercial banks and other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States file capital movement reports with district FRBs. Beginning in late 1998, the Federal Reserve Board also performs services on behalf of the Treasury in support of this data collection system.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms and nonbanking enterprises. Copies of the reporting forms and instructions may be obtained from the Office of Program Services, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district FRBs.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. However, information may not always reflect the ultimate ownership of assets. Reporting instructions are not required to go beyond addresses shown on their records and so may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign financial institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite "Other Europe."

Banks and other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States must file reports. These enterprises include the branches, agencies, subsidiaries and other affiliates in the United States of foreign banking and nonbanking firms. Those with liabilities, claims or securities transactions below specified exemption levels are exempt from reporting.

Banks and other depository institutions, and some brokers and dealers, file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items attributed to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies. The exemption level applicable to these banking reports is \$15 million.

Banks and other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions with foreigners in long-term securities. They must report

securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$2 million during the covered month.

Exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions and brokers), and other nonbanking enterprises must file reports quarterly if liabilities to, or claims on, unaffiliated foreigners amount to \$10 million or more at the end of the covered quarter.

Nonbanking enterprises also report each month their aggregate U.S. dollar denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. The principal exceptions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce (Commerce) in its regular reports on the U.S. balance of payments.

- **Section I** presents liabilities to foreigners reported by U.S. banks and other depository institutions, as well as brokers and dealers. Dollar liabilities are reported monthly; those denominated in foreign currencies are reported quarterly. Respondents report certain of their own liabilities and a wide range of their currently liabilities to foreigners.

- **Section II** presents claims on foreigners reported by U.S. banks and other depository institutions, brokers and dealers. Data on banks' claims held for their own account are collected monthly. Information on claims held for their domestic customers as well as on foreign currency claims is collected on a quarterly basis only. Maturity data are reported according to time remaining to maturity. Reporting also covers certain items held by brokers and dealers in the United States.

- **Section III** contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December.

- **Section IV** shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions and brokers), and other nonbanking enterprises in the United States. Information does not include accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to Commerce on its direct investment forms. Data

ex clude claims on foreigners held through banks in the United States.

- **Section V** contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, brokers and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly issued securities as well as transactions in and redemptions of outstanding issues. However, the data do not include non-marketable Treasury bonds and notes shown in table IFS-3.

The geographical break down of the transactions data does not necessarily reflect the domicile of the ultimate owners or the original issuers of the securities. This is because the path of a security is not tracked prior to its being purchased from, or after it is sold to, a foreigner in a portable transaction. That is, before it enters and after it departs the reporting system, own-

ership of a security may be transferred between foreigners of different countries. Such transfers may occur any number of times and are concealed among the net figures for U.S. transactions opposite individual countries. Hence, the geographical breakdown shows only the country of domicile of the foreign buyers and sellers of securities in a particular round of transactions.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities and on the gross foreign liabilities and claims reported by banks in the United States are available on the Treasury International Capital (TIC) reporting system website: <http://www.ustreas.gov/tic>. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website is a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated on the last business day of each month.

¹ These data as of Dec. 31, 1998.² Excludes negotiable time certificates of deposit, which are included in "Other liabilities."³ U.S. Treasury bills and certificates held in custody for the account of oil-exporting countries in "Other Asia" and "Other Africa" amount to \$1,449 million.⁴ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."⁵ Includes data on Serbia and Montenegro, which previously formed an entity not fully recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.⁶ Formerly known as Zaire.

CHART CM-A.—U.S. Liabilities to Foreigners Reported by U.S. Banks, Brokers and Dealers with Respect to Selected Countries

[In millions of dollars. Source: Treasury International Capital Reporting System]

Grand total.....	1,265,555	1,400,551	1,448,962	1,510,297	1,512,709

In the first quarter of 2000, U.S. banking liabilities increased only \$2 billion. Increases opposite the Caribbean financial centers (\$14 billion), Europe (\$13 billion), and the rest of the world (\$6 billion) barely offset decreases in U.S. banking liabilities opposite Japan (\$14 billion) and "All other Asia" (\$17 billion).

U.S. banking liabilities to foreigners, excluding long-term securities, are concentrated in international financial centers. The data on this page show that nearly one-half of U.S. banking liabilities currently reported opposite the United Kingdom and the banking centers in the Caribbean. Foreigners domiciled in the rest of Europe and in Asia hold an additional 40 percent.

U.S. banking liabilities in the mid-1990s went through a growth spurt. The annual growth rate between 1993 and 1997 averaged 10 percent. Growth in 1998 and 1999 slowed to less than 5 percent per year, which is more in line with the 1989 through 1992 period.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as inde-

pendent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Formerly known as Zaire.

CHART CM-B.—U.S. Claims on Foreigners

Reported by U.S. Banks, Brokers and Dealers with Respect to Selected Countries

Claims opposite Asia continued to fall in 1999 and now stand \$75 billion below their end-1997 level. Claims opposite "All other countries" also fell in 1999. Canada represented \$17 billion of the decrease in that group. Claims opposite Europe, notably Switzerland, and the Caribbean financial centers increased in 1999.

U.S. banking claims on foreigners, excluding long-term securities, are concentrated in international financial centers. The data on this page show that over three-quarters of U.S. claims currently are reported opposite the United Kingdom, "All other Europe," and, most notably, the banking centers in the Caribbean. Foreigners domiciled in Asia hold less than 10 per cent of U.S. claims, down from 20 per cent at the end of 1996.

After extremely strong growth in the mid-1990s, total U.S. banking claims on foreigners are leveling off. Annual growth peaked at 15 per cent in 1997. In 1998 and the first three quarters of 1999, claims grew at a much slower annual rate of 3 per cent. For 1999 as a whole, banking claims increased \$69 billion, or 7 per cent, because of strong growth in the fourth quarter.

Data for entities of the former Yugoslavia recognized as independent

entities by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Formerly known as Zaire.

CHART CM-C.—Net Purchases of Long-Term Domestic Securities by Foreigners, Selected Countries

U.S. banks, brokers, and other persons report foreigners' transactions in long-term U.S. securities (that is U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks), which are conducted largely through international financial centers. The data on this page present aggregate net purchases on an annual basis for 1996 through 1999, as well as activity for the first quarter of 2000. The figures show that foreigners' annual net purchases (gross purchases minus gross sales) of U.S. securities have maintained an extremely high level since 1996.

Annual net foreign purchases of U.S. securities first surpassed \$100 billion in 1993. They reached a record high of \$388 billion in 1997. Since then, annual net purchases have averaged about \$315 billion. Net purchases amounted to \$141 billion in the first quarter of 2000, of which \$93 billion was reported opposite Europe.

Over the past few years, the composition of foreigners' net purchases has changed dramatically. In the mid-1990s, the majority of foreigners' net purchases consisted of U.S. Treasury bonds and notes. Since 1997, however, foreigners increasingly have turned to other long-term securities.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

Beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and be-

ginning in June 1994 for the Former Yugoslav Republic of Macedonia, Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates (Trucial States).

⁴ Formerly known as Zaire.

⁵ Includes Algeria, Gabon, Libya and Nigeria.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as

independent states by the United States are reported under "Other Europe" as follows:

Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Formerly known as Zaire.

CHART CM-D.—Net Purchases of Long-Term Foreign Securities by U.S. Investors *

The data on this page represent U.S. investors' purchases and sales of long-term foreign securities as reported to the Treasury International Capital (TIC) reporting system. However, in the past 2 years, U.S. investors also have acquired a substantial amount of foreign stocks, mostly European, through mergers that involve stock swaps. Net acquisitions through stock swaps amounted to \$86 billion in 1998 and \$114 billion in 1999. These stock swaps are not reported under the TIC reporting system.

Taking into account the stock swaps, annual U.S. net purchases of long-term foreign securities have averaged about \$100 billion since the mid-1990s, with out much variation from year to year. In 1999, net stock purchases, including the stock swaps, totaled about \$95 billion, mostly through Europe and Japan. Net bond purchases totaled \$6 billion, far below the levels of the mid-1990s. In the first quarter of 2000, net purchases of foreign stocks and bonds reported to the TIC reporting system totaled \$26 billion.

Type	1995	1996	1997	1998	1999	2000 Jan. - Mar.
<hr/>						
Foreign bonds	48,405	51,369	48,144	17,349	5,676	9,774
Foreign stocks	50,291	59,268	40,939	-6,212	-15,643	15,760
Total	<u>98,696</u>	<u>110,637</u>	<u>89,083</u>	<u>11,137</u>	<u>-9,967</u>	<u>25,534</u>

*Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

TABLE CM-V-3.—Net Foreign Transactions in Long-Term Domestic Securities by Type and Country

[In millions of dollars; negative figures indicate net sales by foreigners to U.S. residents or a net out flow of capital from the United States.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

Beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and be-

ginning in June 1994 for the Former Yugoslav Republic of Macedonia, Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates (Trucial States).

⁴ Formerly known as Zaire.

⁵ Includes Algeria, Gabon, Libya and Nigeria.

¹Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

²Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as

independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

³Formerly known as Zaire.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as

independent states by the United States are reported under "Other Europe" as follows:

Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Formerly known as Zaire.

CHART CM-D.—Net Purchases of Long-Term Foreign Securities by U.S. Investors *

The data on this page represent U.S. investors' purchases and sales of long-term foreign securities as reported to the Treasury International Capital (TIC) reporting system. However, in the past 2 years, U.S. investors also have acquired a substantial amount of foreign stocks, mostly European, through mergers that involve stock swaps. Net acquisitions through stock swaps amounted to \$86 billion in 1998 and \$114 billion in 1999. These stock swaps are not reported under the TIC reporting system.

Taking into account the stock swaps, annual U.S. net purchases of long-term foreign securities have averaged about \$100 billion since the mid-1990s, with out much variation from year to year. In 1999, net stock purchases, including the stock swaps, totaled about \$95 billion, mostly through Europe and Japan. Net bond purchases totaled \$6 billion, far below the levels of the mid-1990s. In the first quarter of 2000, net purchases of foreign stocks and bonds reported to the TIC reporting system totaled \$26 billion.

Type	1995	1996	1997	1998	1999	2000 Jan. - Mar.
[In millions of dollars. Source: Treasury International Capital Reporting System]						
Foreign bonds	48,405	51,369	48,144	17,349	5,676	9,774
Foreign stocks	50,291	59,268	40,939	-6,212	-15,643	15,760
Total	98,696	110,637	89,083	11,137	-9,967	25,534

*Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

INTRODUCTION: Foreign Currency Positions

The "Treasury Bulletin" reports for foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of six major foreign currencies (Canadian dollar, German mark, Japanese yen, Swiss franc, pound sterling and Euro) and the U.S. dollar. Foreign currency positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate "all other" currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, for forward exchange contracts bought and sold, for foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold. Exemptions from filing the monthly report are given to banking institutions that file the Federal Financial Institutions

Examination Council (FFIEC) 035 report ("Monthly Consolidated Foreign Currency Report").

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$1 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September or December). Exemptions from filing the quarterly report are given to major nonbank market participants that file weekly and monthly reports and banking institutions that file FFIEC 035 reports.

This information is published in seven sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VII-1 present the currency data reported weekly by major market participants. Tables I-2 through VII-2 present more detailed currency data of major market participants, based on monthly Treasury and FFIEC 035 reports. Tables I-3 through VII-3 present quarterly consolidated currency data reported by large market participants and FFIEC reporters that do not file weekly reports.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option's value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table ESF-1 presents the assets, liabilities and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

- Table ESF-2 shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations"

TABLE ESF-1.—Balances as of Oct. 1, 1999, and Dec. 31, 1999

INTRODUCTION: Financial Report of the United States Government

The following pages are excerpted from the 1999 "Financial Report of the United States Government." The report and accompanying information, prepared and published annually by the Financial Management Service, are modeled after corporate-type reports and are developed on an accrual basis of accounting.

The excerpts represent some of the most noteworthy information contained in the Financial Report. Data for the Financial Report are compiled from Federal program agency ac-

counting systems governmentwide. Treasury also presents a management discussion and analysis, the customary notes to the financial statements, a section on "Stewardship Information" and supplemental information, in the complete document.

The General Accounting Office (GAO) is required by law to audit the Financial Report. GAO's report, as well as the complete Financial Report, can be easily accessed through the internet at www.fms.treas.gov/cfs.

Statement of Operations and Changes in Net Position

The statement of operations and changes in net position reports the results of Government operations. This includes revenues generated by the Government's sovereign power to tax, levy duties, and assess fines and penalties. The statement covers the net cost of Government operations, net of revenue earned from the sale of goods and services to the public. It also includes any adjustments and unrecorded transactions that affect the net position.

Net cost of Government operations

Net cost of Government operations is the cost of operations reported in the statement of net cost, which is gross cost minus earned revenue.

Revenues: financing sources from non-exchange revenue

The main source of revenue for Government operations is non-exchange revenue, which consists of taxes and other revenue the Federal Government generates under its governmental powers or receives by donation.

Miscellaneous earned revenue

Miscellaneous earned revenue consists of exchange revenues from the public with virtually no associated costs. These items include revenues from spectrum auctions, rents and royalties on the Outer Continental Shelf Lands.

Unreconciled transactions

Unreconciled transactions are adjustments made to balance the change in net position.

Net position – beginning of period

This amount is the net position reported on the prior year's Balance Sheet.

Prior period adjustments

Prior period adjustments are made to revise the beginning net position balance due to accounting principle changes and other adjustments.

Net position – end of period

This is the amount reported as net position on the current year's Balance Sheet.

Statement of Net Cost

This statement shows the net costs of Government operations for fiscal 1999, which is funded by taxation or through

Federal borrowing. The statement reflects the costs incurred to carry out the national priorities as determined by law.

Cost is divided among major functions, which are the same as in the budget except that the allocation of costs to the functions is based on accounting standards. Thus costs are reported on an accrual basis and allocated differently than in the budget. For example, the costs of pensions and retiree health benefits are allocated among all functions that employ workers rather than a subfunction in the constituency function.

A description of all functions and the components of net cost for the activities included in the function is located in the supplemental information section of the "Financial Report of the United States Government" as "Net Cost Detail."

The statement contains the following three components for each function:

- The gross cost of Government operations;
- The revenues earned from the public for goods and services; and
- The net cost of Government operations, which is the gross cost less the revenue earned.

Gross cost

Gross cost includes the full cost of the functions. These costs may be directly traced, as signed on a cause and effect basis or reasonably allocated to the function.

Earned revenue

These are revenues that the U.S. Government has earned by providing goods and services to the public at a price.

Net cost

The net cost of Government operations is the gross cost less the earned revenues.

Balance Sheet

This statement shows the operating assets of the Government that were acquired under fiscal 1999, and prior year budgets. These assets remain available as resources to supply Government goods and services in the future. The statement also shows the Government's operating liabilities including debt held by the public.

It includes some liabilities that have not yet been funded by appropriations. The net position shown in the statement reflects operating assets less liabilities.

**United States Government
Statement of Operations and Changes in Net Position
for the Year Ended September 30, 1999**

(In billions of dollars)

Revenue:

Individual income tax and tax withholdings	1,456.0
Corporation income taxes	182.2
Unemployment taxes	25.6
Excise taxes	70.5
Estate and gift taxes	27.7
Customs duties	18.4
Other taxes and receipts	42.0
Miscellaneous earned revenues	10.5
Total revenue	1,832.9

Net Cost of Government Operations:

National defense	413.2
Human resources	905.3
Physical resources	95.1
Interest	230.1
Other functions	112.3
Total net cost of Government operations	1,756.0

Excess of revenue over net cost 76.9

Unreconciled transactions affecting the change in net position (Note 16)	24.4
---	------

Increase in net position 101.3

Net position, beginning of period -6,134.4

Prior Period Adjustments (Note 17)

6.9

Net position, end of period -6,026.2

TABLE TF-15A.—Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment to the Intermodal Surface Transportation Efficiency Act of 1991 and represents data concerning the Highway Trust Fund. The figure described as "unfunded authorizations" is the latest estimate received from the DOT for fiscal 1999.

The 24-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury's Office of Tax Analysis for exercise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal 1999.

Highway Account

[In millions of dollars. Source: DOT]

Unfunded authorizations (EOY).....	36,836
24-month revenue estimate.....	60,006

Mass Transit Account

[In millions of dollars. Source: DOT]

Unfunded authorizations (EOY).....	-6,540
24-month revenue estimate.....	9,453

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, I and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purchased intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority may also be classified as current or permanent. Permanent authority requires no curtailment by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue—The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes and 1890 Series Treasury notes.

Current income bonds (“U.S. Savings Bonds and Notes”)—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of March 2000, the debt limit was \$5,950,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury's public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupons issued to securities.

Dollar coins (USCC)—Include standard silver and non-silver coins.

Domestic series (FD-2)—Nonmarketable, interest and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve Banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series issues. The Federal Reserve note is the only class of currency currently is sued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States, and international and regional organizations, wherever located. Also, refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all

Glossary

departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, for foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Employment Trust Fund.

Interfund transactions (“Federal Fiscal Operations”)—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in an other group.

International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions (“Federal Fiscal Operations”)—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, I, J and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967

and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

Noncompetitive tenders (“Treasury Financing Operations”)—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Off-budget Federal entities (“Federal Fiscal Operations”)—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surpluses or deficits are not included in budget receipts, outlays or deficits. Their budget authority is not included in totals of the budget.

Outlays (“Federal Fiscal Operations”)—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices (“Capital Movements”)—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing (“Treasury Financing Operations”)—Treasury has historically offered packages of several “coupons” security issues on the 15th of February, May, August and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new securities. (See Reopening.)

Receipts (“Federal Fiscal Operations”)—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3, -4)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number and interest rate as the original issue.

Special drawing rights (“Exchange Stabilization Fund,” IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members’ quotas in IMF. Although shown in exchange stabilization fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legal tender. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot (“Foreign Currency Positions”)—Due for receipt or delivery within 2 work days.

State and local government series (FD-2)—(SLUGs) Special nonmarketable certificates, notes and bonds offered to

Glossary

State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLUGs are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components,

which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), they are sold at a discount.

Trust fund transaction (“Federal Fiscal Operations”)—An intra-budgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Islands, Virgin Islands, Wake Island and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
